Work.

PRINCIPLE STUDIOS | Engineering Manager

Dec 2018 - Present

- Organize and lead client projects including building cloud-hosted web applications, business critical system migrations, technology re-platforms, provider service upgrades, web property acquisitions and new site implementations
- Directly manage a 5-person engineering team across unique client projects, providing mentorship, training, code review and continuous career development
- Actively promote an inclusive and collaborative environment, fostering positive team culture and always seeking opportunities for continuous improvement
- Manage all stages of the product lifecycle from planning, development, release management and post-release activities
- Provide guidance for clients across a diverse set of industries on various activities, including CMS architecture and management, TypeScript-driven front-ends, and containerization architecture
- Collaborate with key stakeholders and cross-functional teams to strategize on complex projects and technical integrations; Negotiate scope, ensure operational readiness, assess impact of changes and mitigate risks in order to deliver successfully on schedule

XCENTIUM | Front-End Director

Aug 2017 - Dec 2018

- Responsible for the estimation, planning, and development of multiple enterprise-level front-end architectures utilizing current front-end technologies such as Vue.js, Bootstrap Vue, Babel, and Webpack. Additional responsibilities include hiring, managing, and mentoring developers in the front-end department
- Implement software engineering best practices including Agile, DevOps, CI/CD, coding standards to ensure the build process, testing and releases result in high-quality products
- Facilitate communication between different business units - Development, architecture, SRE, UX, Product Management, Support
- Work with clients, stakeholders, and management throughout the lifecycle of software development
- Successes include the redesign and launch of the American Heart Association website, implementing a new front-end developer hiring process, and hiring 4 developers to bring the front-end department to 10 developers

CHARLES SCHWAB | Front-End Developer

Oct 2012 - Apr 2014

- Translate wireframes and PSDs into pixel-perfect landing pages, email templates, and mini-websites for traditional browser and mobile platforms with a focus on accessibility
- Responsible for development of reusable assets, including JavaScript libraries, HTML templates, and CSS frameworks, across all delivery platforms
- Manage the development and communication requirements of multiple projects concurrently throughout all stages of development
- Successfully launch over 50 web development projects, receiving multiple Marketing Excellence awards for my role as a front-end web developer.
